

Eccellio announces new “slices” for Science miner

The Scientific community will start to find easily everything about Publications and Computer Science topics

Bellevue, WA - June 9, 2009 - Eccellio™ today announced that two new filters have been added on Eccellio Science: “Publications” and “Computer Science”. Using Publications you can easily find content focused on the huge world of academic research. Using Computer Science you can narrow your searches on the study of the theoretical foundations of information and computation. In addition a new PostScript filter has been also added in the right-menu that is dedicated to file-types filter.

“All of these new features came from feedbacks thanks to our great users. Eccellio wants to thanks all the people who have submitted feedbacks and has started to love our project”.

Eccellio Science (<http://science.eccellio.com>) is fully dedicated to students and researchers that want to obtain fresh results focused on Science matters from accredited and specialized sites.

About Eccellio

Eccellio is an Internet company founded in 2008 that has its focus on improving end user experience in retrieving information on Internet. Eccellio is a Search Engine that brings a cool new feature, named "Faceted Classification", that easily allows finding exactly what you are looking for. Eccellio uses Google database but it adds an extra level of classification that allows you to refine your search easily. End users don't need to learn a complex syntax to execute searches. So Eccellio can be defined as Google++ or Google simplicity with one additional single-click. For more information:
