

Eccellio announces new domain-filters option

**Two new filters by domain have been added to
improve your search experience**

Bellevue, WA - October 12, 2009 - Eccellio™ (www.eccellio.com) today announced that two new features have been added to all its free services. “*Search by your domain*” adds the chance to filter using your own domain based on your current language; 51 new country-domains have been added, but only one will be displayed on the left menu (that already hosts common country domains). The full list of new country-domains is available [here](#).

The second new feature, named “*Search by top level domain*”, is the ability to filter using the most common top-level domains like edu, org, net, etc. This option is available in a new menu on the right part of the screen.

“All of these two new features came from feedbacks from our great users. All of us in Eccellio want to thanks all the people who have submitted feedbacks in the past months and have become part of the Eccellio community. Eccellio is growing a lot in popularity and this enforce us day-by-day to provide to the Net community the best tool to easily find what they are looking for. Find more, write less.” said Ron Bernas, Chief Executive Officer of Eccellio.

About Eccellio

Eccellio is an Internet company founded in 2008 that has is focus on improving end user experience in retrieving information on Internet. Eccellio is a Search Engine that brings a cool new feature, named “Faceted Classification”, that easily allows finding exactly what you are looking for. Eccellio uses Google database but it adds an extra level of classification that allows you to refine your search easily. End users don’t need to learn a complex syntax to execute searches. So Eccellio can be defined as Google++ or Google simplicity with one additional single-click. For more information:
